Name: Dave Doan

Make/Model of Vehicle: 1993 Ford F-250 dually

Type of unit used: Diesel

Testimony:

Hi,

I would like to relate my experience with the TADGER. I have a 1993 Ford F-250 diesel (non turbo) converted to a dually.

I was getting approximately 10-12 mpg since the conversion.

I installed (quite easily) the Tadger unit and the truck smoked, spit, and sputtered for about 30 seconds and then idled smoothly. I jumped in for a test run and... WOW...it was like installing a turbocharger...the performance has dramatically improved... and the mileage has amazingly increased to approximately 17-18 mpg!!!

I am very impressed!

Thanks.
