---

**Name: Scott Eccles**

**Make/Model of Vehicle: 1995 Chevy Caprice (Rear wheel drive)**

**Type of unit used: Gas**

### **Testimony:**

**Hi, I'd like to report some great results for fuel economy using the Tadger. I am on the road a lot doing sales, and my road car is a 1995 Chevy Caprice rear wheel drive. It is a V-8 engine with multi-port fuel injection. I monitor fuel consumption to keep track of expenses.**

**I acquired a Tadger device in early March of 2001. Just before installation I tracked fuel consumption. It worked out to 19 miles per gallon or 6.74 kilometers per litre, combined city and highway driving.**

**I then installed the Tadger according to the instructions and found a real noticeable difference in fuel economy.**

**I am now experiencing 22% - 30% better fuel economy.**

**I have not yet had to take my car in for emissions testing, but I am sure because of the clean burn effect I'll have no problem passing.**

**It's like buying gas for about 49 cents a litre. Remember those days?**

**I just went on a drive this past week to Texas and with all highway driving, I experienced an amazing 31.26 miles per gallon average (calculated to Canadian Gallons) on one of my fill-ups, my speeds being around 75-80 mph. All my paperwork and results are available if any one requests them.**

**Thanks for a great fuel saver.**
