Tadger Group

Over a year ago we carried out a controlled test to evaluate a Tadger unit for mileage improvement. We selected 12 highway vehicles and divided them into two groups of 6. We compared the mileage of each group over the previous 12 months and then installed Tadgers on one of the groups of 6. After 6 months of testing it was determined that the Tadger trucks outperformed the control trucks by over 4%. We were looking for an ROI of 12 months or less. Our ROI was 5 months.

We have now installed Tadgers on all our trucks and would like to thank Tadger Group for their help. Considering the loads we carry, this has made a big difference in our fuel expense.

We also feel good about the reduction in harmful exhaust emissions because of the Tadgers. Our community will benefit.

Sincerely,

Denis Marcus, Owner,  
Harold Marcus Ltd.
