

May 21, 2009

Dear Tadger Group,

We are always looking for a means to reduce fuel consumption in our current market.

Several tests have been conducted with the Tadger unit on our excavators, dozers, trucks, and gen-sets and all complied satisfactorily with fuel efficiency. We have installed Tadgers on all of our heavy equipment and these procedures will continue for new equipment. After installing the Tadgers, we have noticed a substantial reduction in fuel consumption and our engines are performing much better.

We are highly impressed with the results.

Sincerely,

Justin de Melo
Equipment Manager
L82 Construction Ltd.
