

To Whom It May Concern,

I would like to share with you our Company's positive experience with the Tadger Group and their exclusive distributor in Western Canada, Envirotek Associates. In December 2005 following some previous exposure to Tadger, we went through a full presentation on the Tadger. At the end of the presentation an offer from Tadger and Envirotek to participate in a trial period was made, along with a money back guarantee if a fuel savings of at least 3% were not realized. We agreed to a 90-day trial period commencing in January 2006. We purchased 6 units and installed them. Using Tadgers test protocol as close as possible, our trial ended in April 2006 and upon analyzing the results of our on road experience an average of 5.38% was realized from the Tadger equipped trucks.

In my experience with fuel economy enhancing products, either mechanical or additives, claims of 10, 15 or even 20 per cent improvement are not uncommon nor are negative or inconsistent results. With the Tadger product and a guarantee of at least 3% we are at least confident that the results are attainable and at 5.38% our return on investment is in line with our initial cost.

We are in the process of ordering Tadgers for the remainder of our fleet and will be sharing our experience with our Independent Contractors and sister companies. I have no hesitation in recommending Envirotek Associates and the Tadger Group to any fleet manager looking to reduce fleet emissions and fuel costs. 3% may not seem like a lot but spread it out over a fleet in a year and the number becomes impressive.

I am satisfied with the performance of the Tadger Group. They have performed in a professional manner, stood behind their product and delivered the promised results. Please accept this declaration over my signature and I respectfully request that any enquiries regarding the Tadger product be directed to the Tadger Group. The product works and our action is ample evidence of our satisfaction.

Sincerely,

Kelly Scheer
Director of Maintenance
Mullen Trucking LP
