

January 7, 2004

Attention: Bill Johnston

Dear Bill,

I am preparing this letter to express my satisfaction with your emission reduction system. Newmont Mines procured service with your firm in February 2002.

By installing your unit on our fleet, we realised a direct emissions reduction of Opacity being reduced by over 50% for diesel. This represents a major reduction in toxic emissions and particulates being expelled from our units. It is also noted that as a result of these emissions reductions, we have been able to realize a fuel savings that will realize a return on investment which our testing showed was well over 3%.

I highly recommend your services and technology for any fleet manager looking to reduce their fleet emissions and improve fuel economy. It is a pleasure to deal with a company who actually delivers what they promise and I feel that it is true value for every dollar spent.

Sincerely,  
Newmont Mines,
