

The TADGER Group

E-mail: support@tadgergroup.com Web site: www.tadgergroup.com

Name: Jim Teahen

Make/Model of Vehicle: 1991 Mercedes Benz SEL560

Type of unit used: Gas

Testimony:

Prior to TADGER, pre-test showed the vehicle did not pass the Drive Clean Emissions testing of Ontario.

Following installation of the TADGER;

HC down to 6ppm

Carbon Monoxide 0.01

Oxygen 047

Carbon Dioxide 15.24

The car passed in all areas.

Prior to installation, I was getting 3.2 miles per litre, after installation, this increased to 4.5 miles per litre (City driving). This is a 40.6 % savings.

Prior to installation, I was getting 4.1 miles per litre, after installation, this increased to 5.0 miles per litre (Highway driving). This is a 22 % savings.

This device is so good that I became an Independent Agent.

I totally support this product !!
