

I have a 93 Fourwinn 235 Sundowner with a 5.8 King Cobra motor and power train. Since I have installed the Tadger I have seen an extremely large reduction of black soot build up on the transom of my boat. I no longer have to clean it after a daily run. Even though I don't have a mileage counter, for the hours of use I have seen an improvement in fuel consumption. I can now run further with the same amount of fuel. Installation of the Tadger was easy and required no modification to the engine.
