---

**Name: John Mogford**

**Make/Model of Vehicle: 1999 Dodge Grand Caravan**

**Type of unit used: Gas**

**Testimony:**

**My Caravan has a 3.8L engine and I usually average 8500 km per month.**

**Before installing the Tadger I was averaging 520 km every 7/8 of a tank of gas. I track my mileage from a full tank until my gas sensor light illuminates.**

**After installing the Tadger I am averaging 580 km every 7/8 of a tank of gas. This equates to a savings of 11.5 %**

**The clean burn effect has also improved my oil change frequency. Due to my high mileage, I would change my oil every 7,500 km. Since installing the Tadger I now change my oil every 10,000 km. During my last oil change, I viewed a sample of the oil. I was happy to witness that the oil was only medium brown in colour. I have calculated that I save \$ 125.00 per year on fewer oil changes.**

**I believe that this product is a must for anyone looking to reduce emissions, improve engine performance, extend oil life and/or save fuel.**
