

Tadger Group Gas Install Instructions for Kit #:

B5T-QC-R

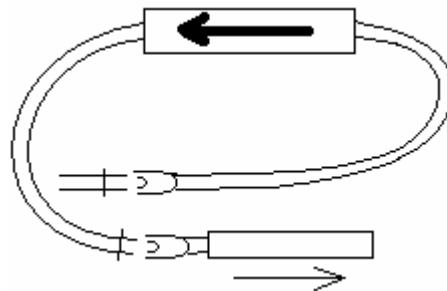

ORIGINAL ENGINE FUEL LINE SETUP

TADGER KIT

INSTALLATION

1. Locate quick connect in fuel line, where fuel line from tank connects to engine fuel rail or line leading to fuel rail. If not visible follow backwards from fuel rail.
2. Separate male and female parts of quick connect by squeezing both sides of female quick connect with fingers. If difficult, a quick disconnect tool may be required.
3. Insert head of kit into end of fuel line leading to fuel rail.
4. Attach tail end of kit to male tube coming from fuel tank.
5. Tie off Tadger kit securely with ties to minimize movement. It does not require a solid mounting bracket. Use loom or rubber to separate components at any point where rubbing may occur.
