

Reduce emissions while improving fuel mileage

EnviroTek Associates, which I co founded is the Exclusive Distributor of the TADGER in Canada for Tadger Group International.

The TADGER from my personal experience produces fewer emissions and uses less fuel and contributes to longer oil life and increased get up and go.

I would not buy the TADGER based on fuel economy alone. It's an emission product that reduces toxic emissions but it will reduce your fuel costs. It cannot be lumped in with the countless gimmicks on the market that promise improved fuel economy but rarely deliver. Why? It WORKS!

In 25,000km after installing the TADGER on my last personal vehicle, a 2001 3.5L Oldsmobile Aurora, I experienced a smoother running engine, more get up and go cleaner oil and a 9.56% reduction in fuel cost. My Ontario Drive Clean Certificate at 170,000 km showed 00 readings for both CO and NOX, passing with flying colours. The TADGER works for me to leave a cleaner environment for my children and grandchildren.
