

Forest City Cartage and Delivery Inc.
575 Industrial Rd.
London, ON
N5V 1V2

We are always looking for ways to get a competitive edge in our market. Although I was skeptical when first introduced to the Tadger, I liked the idea that it was maintenance free and guaranteed for life.

After reviewing other fleet testing and the TMC/SAE Type IV Test, we did some testing of our own and as predicted, our results were almost identical to the reports from several other fleets.

One driver who drove the same tractor day in and day out could tell there was an increase in power.

We have been well looked after by Tadger Group and now have Tadgers on all of our tractors, straight trucks and vans.

We are extremely satisfied with the mileage improvement of over 3.5% and are proud of the fact that we are reducing exhaust emissions on every engine. The services provided by Tadger Group have been very professional, and the product delivered precisely what was claimed at the outset.
