

Since one year we drive our **PT Cruiser**, built in 2003, with a Tadger. Without a Tadger we never made more than 23.5 miles per gallon. We drive daily on highways and in town.

In **winter** our average **mileage** was about **18.8** and in the **summer** we had about **21.15**.

Since the Tadger is installed we always drive more than 23.5 miles per gallon, even in winter!

What we like especially, besides the financial benefits, is that we do something for the environment. Emissions with Tadger installed are much less than without a Tadger.

We can only recommend the Tadger by heart. With so many vehicles on the road everyone should drive with a Tadger!

Many greetings

Heinz Hoerath
