Dear Mr. Kietzman:

We appreciate your time and effort convincing us to try the gas saver device. The gas savings are very, very helpful for our family. This device is also good for America by conserving gas. I hope you sell thousands more.

Our primary vehicle for commuting to work every day is our 2003 Pontiac Montana minivan. I commute five days a week racking up 164 miles per day. We use to average 24 miles to the gallon and now our mileage increased between 1 and 1.5 miles to the gallon. This device will pay for itself within 6 months.

It sure would help America out, if a majority of the U.S. population and truckers purchased a device like this. Reducing our dependence of 3-10% would shock the world.

Thanks so much for the quality product.

Sincerely,

A handwritten signature in black ink, appearing to read "John Weller", written in a cursive style.
