In September 2003 I purchased a new Pontiac Montana minivan for my business, JUST KITCHENS. One of the gadgets that came with this vehicle was a device that instantly computes fuel economy. Before I installed the Tadger, my highway fuel consumption was 11.8 L./100 km. Immediately after installing the Tadger the fuel consumption dropped to 10.9L/100km. This fuel savings of 8.25% translates into an annual savings to me of \$235. I am pleased with any investment that helps reduce pollutants and pays for itself so quickly.
