Re: TADGER performance on 2006 KIA Sedona

After tracking my mileage performance for 1 month and recording an average of 7.8 km/litre, I installed the TADGER on my new 2006 Kia Sedona. I was pleasantly surprised to see an almost immediate decrease in gas consumption. I am now averaging 8.5 km/litre which represents a 9% decrease in gas consumption.

I am an avid golfer who “commutes” to my place of work (the golf course) and drives to Myrtle Beach every year, not to mention side trips throughout the year. I probably average 30,000 km per year on my vehicle, which at today’s gas prices, represents a savings of about \$400 per year.

With the TADGER, I have not only saved money, I am doing my small part in reducing harmful emissions into the atmosphere.
