Hi Folks:

Well I can certainly talk about my success with the Tadger on my truck, it works!

I have a 2006 Ford F150 SuperCrew Four wheel drive with the big gas engine and being a former tractor-trailer driver I love to drive but fuel has gotten expensive.

I am now a computer consultant and regularly work in Portland, Oregon, it's too close to fly so I drive my truck down. My fuel mileage before installing my Tadger was 12 miles per gallon, once adding my Tadger my mileage for the same trip went up to 15 miles per gallon.

A remarkable increase and money in my pocket.
